TO WHOM IT MAY CONCERN

Reference for BallPark Developments Ltd

BallPark Developments recently completed work upgrading and improving our car park. The work involved re-tarmac the surface, redesigning the car park layout to allow for more spaces and relocating the lighting.

The Trust is a Registered Charity and as such need to make best use of the scarce resources we have available.

BallPark helped us redesign the car park area making sure we got best use of the land available and advising us where savings could be made.

Before work commenced we agreed a figure for the work of £43,000 plus VAT, all works were completed within the time stated and within budget.

We are very happy with the finished car park and would definitely use BallPark Developments again.
